

# DuPont™ Tyvek® Tape

Specify DuPont™ Tyvek® Tape in commercial building applications to finish the job

DuPont™ Tyvek® Tape is specially engineered to provide the best adhesion to DuPont™ Tyvek®.

Taping the seams after wrapping is the best practice for completely sealing the building envelope.

In commercial construction, DuPont™ Tyvek® Tape is the crucial final step for maximum reduction of air and water infiltration through the building envelope.

Using a quality weather barrier on a commercial building is as important as installing it properly. Taping the seams after wrapping, in addition to taping any tears or holes, is the best practice for maximum reduction of air and water intrusion into the building envelope.

**DuPont™ Tyvek® Tape** features a specially engineered adhesive to create the best adhesion to **DuPont Building Envelope Solutions** in any climate. **Tyvek® Tape** works when other tapes won't, sealing seams for a continuous protective barrier against air and water infiltration.
